

HCC/FOSS Panel

FOSS = “Sociotechnical `Systems’”

- “Frameworks” for approaching STS?
 - Technical: Technical capacities, constraints,, dependencies, infrastructure, time, dynamics...
 - Social: Social **processes**, structures, meanings, sensemaking, institutions, dynamics,...
 - “Seamless Web”

“Seamless Web”

"Since the mid-1980s, there has been a movement away from both the technological and socio-economic determinisms that have been defining (and conflicting) central metaphors in the relationship between technology and society, and towards the metaphor of the “seamless web of technology and society” (Pinch & Bijker, 1994, p. 10)."
[Kling, 1998]

How to theorize this, for FOSS?

Theorizing Technology

"...we argue that the field has not deeply engaged its core subject matter—the information technology (IT) artifact.... we propose that ... researchers begin to theorize specifically about IT artifacts, and then incorporate these theories explicitly into their studies." [Orlikowski & Iacono, 2000]

Technical (Brief)

- **Capabilities:** Organizing, displaying, communicating, sensing, remembering, preserving, hiding, relating, trading-off....
- **Constraints:** Limits, speed, space, maintainability, access, installability, ...
- **Dependencies:** hardware/software ecologies, networks, ...

Technical (Brief)

- **Infrastructure:** embeddedness, transparency, learned as part of membership, links with conventions of practice, embodiment of standards, built on an installed base, becomes visible upon breakdown.” [Star & Ruhleder, 1996]
- **Time:** temporal rhythms, speed, slowness,...
- **Dynamics:** “invention, innovation, regulation, expansion, slippage, upgrades, patches, cookies, viruses, workarounds, wear and tear, error, and failure.” [Orlokowski & Iacono, 2000]
-

- I. Communicative Processes
- II. Sustaining Processes
- III. Transitional Processes
- IV. Agonistic Processes

Communicative Processes

PART ONE. COMMUNICATIVE PROCESSES

II. <u>SYMBOLIC RECONSTRUCTION</u>	33
Mapping the Environment: Objects	34
Evaluations and Emotional Reactions	40
Symbolic Representation of Objects	46
Human Knowledge as a Social Process	52
Summary and Discussion	58
Suggested Readings	59

Communicative Processes

III.	<u>COMMUNICATION AND CULTURE</u>	61
	Communication as a Serial Process	62
	Formation of Culture Patterns	67
	Norms of Social Interaction	72
	The Media of Mass Communication	78
	Summary and Discussion	86
	Suggested Readings	87
IV.	<u>HUMAN COMMUNITIES</u>	88
	Formation of Community Patterns	89
	Composition of the Population	95
	Segregation in Urban Communities	101
	Cultural Diversity in Mass Societies	109
	Summary and Discussion	116
	Suggested Readings	117
V.	<u>INTERACTION PATTERNS</u>	118
	Accommodation in Routine Situations	120
	Confluent Expression and Suggestibility	126
	Strategic Interaction in Rivalries	131
	Development of Mass Behavior	137
	Summary and Discussion	144
	Suggested Readings	145

Sustaining Processes

PART TWO. SUSTAINING PROCESSES

VI. <u>NORMATIVE FRAMEWORKS</u>	149
Characteristics of Social Norms	150
Acquisition of Social Norms	155
Personal Identity and Moral Conduct	162
Reaffirmation of Social Norms	168
Summary and Discussion	172
Suggested Readings	173

VII.	<u>SOCIAL STRATIFICATION</u>	174
	Bases of Social Stratification	175
	Patterns of Social Inequality	181
	Reaffirmation of Status Differences	190
	Preservation of Social Distance	196
	Summary and Discussion	201
	Suggested Readings	202
VIII.	<u>SUSTAINED ASSOCIATIONS</u>	204
	Constellations Within Communities	206
	Networks of Personal Contacts	212
	Operation of Formal Organizations	219
	Conditions of Group Solidarity	225
	Summary and Discussion	231
	Suggested Readings	232
IX.	<u>REGULATORY INSTITUTIONS</u>	234
	Community Reactions to Deviance	235
	Development of Deviant Careers	241
	Enforcement of Formal Norms	248
	Legitimation and the Moral Order	254
	Summary and Discussion	259
	Suggested Readings	260

Transitional Processes

PART THREE. TRANSITIONAL PROCESSES

X.	<u>PROBLEMATIC SITUATIONS</u>	265
	Crisis and Collective Adaptation	267
	Decisions by Collective Deliberation	272
	Recurrent Patterns of Crowd Behavior	279
	Policy Formation in Mass Societies	288
	Summary and Discussion	296
	Suggested Readings	297
XI.	<u>SOCIAL DISLOCATIONS</u>	299
	Emergence of Incongruities	301
	Factionalism and Marginal Status	308
	Demoralization as a Social Process	316
	Development of Collective Anxiety	323

XII.	<u>SOCIAL MOVEMENTS</u>	332
	Focus of Collective Discontent	333
	Recurrent Patterns of Development	341
	Opposition and Group Solidarity	349
	Problems Facing Successful Movements	356
	Summary and Discussion	362
	Suggested Readings	363
XIII.	<u>SOCIAL RECONSTRUCTION</u>	364
	Selective Acceptance of Innovations	366
	Patterns of Social Mobility	372
	Establishment of Social Norms	379
	Reconstruction of Perspectives	385

Agonistic Processes

PART FOUR. AGONISTIC PROCESSES

XIV.	<u>POWER AND POLITICS</u>	397
	Conflict as a Social Process	399
	Techniques of Negotiation	406
	Techniques of Persuasion	411
	Techniques of Coercion	419
	Summary and Discussion	424
	Suggested Readings	425
XV.	<u>BIPOLARIZATION</u>	427
	Intensification of Rivalries	428
	Formation of Contrast Conceptions	433
	Hostile Outbursts Within Communities	440
	Intervention in Civil Disorders	447

XVI.	<u>ORGANIZED WARFARE</u>	454
	War as a Social Institution	455
	Mobilization of Popular Support	460
	Military Organizations and Careers	467
	The Struggle for Collective Morale	474
	Summary and Discussion	481
	Suggested Readings	482
XVII.	<u>INSURRECTIONS</u>	483
	Conditions of Insurrection	485
	Displacement of the Government	492
	Struggles Among Revolutionary Factions	498
	Reestablishment of Authority	504
	Summary and Discussion	511
	Suggested Readings	512

Examples

- Luis Murillo, ***"Toward a multi-disciplinary FOSS research: contribution of anthropology for the study of "local" FOSS projects."***
- Scott Hissam: ***"Free and Open Source Software Development in High Criticality Domains"*** e.g., "safety culture", sociotechnical aspects of reliability
- Stormy Peters, ***"How people communicate on projects"***
- Patrick Wagstrom, ***"How does FOSS change for users, developers, and researchers as commercial developers enter volunteer communities?"***
- John Riedl, ***"New Members"***

Discussion Questions

1. How thoughts and contributions from the workshop fit with some conception of sociotechnical systems
 - what are the sustaining or agonistic social processes in FOSS "settings";
 - what are the "theories of technology" for FOSS?
2. What are the ***critical unknowns*** (researchable issues) in this space?
3. What makes these unknowns critical for a "science of FOSS"? (what is their “natural significance and practical potential” [DeLong, 2009])
